

Web Accessibility Checklist

PROJECT: _____

Before launch, double check that...

Header Structure

- ☐ Text hierarchy is clearly established (e.g. H1, H2, etc)

Links

- ☐ Linked in-line text is clearly identifiable from body text
- ☐ All hyperlinks are clearly phrased to indicate to users where the link leads

Images

- ☐ All images are accompanied by alt text
- ☐ Alt text is appropriately descriptive for image types

Audio & Visual

- ☐ All videos include captions
- ☐ A transcript of audio content is easily available for users

Colors

- ☐ Colors alone are *not* being used to communicate important messages to users
- ☐ Patterns or textures are used to indicate visual differences on all charts, graphs, etc
- ☐ Elements have a strong color contrast compliant with WCAG. Use a contrast checker if unsure!

Typography

- ☐ Typefaces are legible and characters have distinct features from one another
- ☐ Large bodies of text are left-aligned
- ☐ Text can be easily resized and the webpage still functions as expected
- ☐ Line lengths are close to 66 characters per line

Navigation & Site Structure

- ☐ Navigation is succinct and includes only necessary high-level categories
- ☐ Website's code follows navigation best practices

Forms

- ☐ Form fields have clearly defined boundaries and borders
- ☐ Form fields have clear labels

Other

- ☐ _____
- ☐ _____
- ☐ _____
